

South Hall 1, LVCC, Booth 22048

8th - 11th January 2019

Experience a world first: brighter, lighter AR/VR glasses powered by microLED display technology

We'll be demonstrating:

- The next generation of Vuzix glasses will be available for you to experience. These ditch OLEDs in favour of microLED displays.
- Monochrome addressable and static displays.
- A Monochrome tiling demo.
